Release No: A08
Date: November 2009
Release Date: Immediate

Ti-Series from Synrad

Responding to market demands for more compact and lower cost lasers, while retaining the performance and reliability of the existing *t-series*, Synrad have developed a new RF technology to eliminate the separate RF power supply and associated cables.

Available in 60, 80 and 100W models, the resulting *ti-series* is compact, lower cost, and delivers the high power, fast pulsing, and optical quality essential for applications such as laser coding and large area engraving, where high-speed scanning or modulating of the laser beam is required.

The *ti-series*' combination of compact size, high performance, and low price allows Synrad's customers to succeed in their worldwide markets.
