

PRESS RELEASE

Release No: A11
Date: December 2009
Release Date: Immediate

Autosport 2010: Stand Number E449

Fortus 400mc

Laser Lines will be demonstrating how the Stratasys range of manufacturing centres produce functional plastic parts suitable for low volume production, fabrication tools, assembly tools and prototypes in both production and product development, to save time, reduce costs and improve efficiency.

Also on show is the “Ulyxe” laser marking system for permanent, direct part marking of almost all metals, plastics and composite materials. Laser marking provides an indelible mark that cannot be removed and permits full traceability during the life of the component. Laser marking is a non-contact process ensuring no damage or distortion to the part.

Ulyxe Laser marker

For pre-publication queries contact: Jeryl Adcock (jeryla@laserlines.co.uk)

For sales/technical queries regarding Stratasys products, contact: Mark Tyrtania (markt@laserlines.co.uk)

For sales/technical queries regarding Ulyxe products, contact: Gary Broadhead (garyb@laserlines.co.uk)
