Release No: A26
Date: April 2010
Release Date: Immediate

MACH 2010: Stand Number 4548

New Hewlett Packard 3D Printers Available from Laser Lines Ltd

With many years experience selling the full range of Stratasys 3D Printing and Rapid Prototyping Systems, Laser Lines are now able to add HP Designjet 3D Printers to their portfolio.

Laser Lines have become a Hewlett Packard Preferred Partner so they can offer the HP Designjet 3D and the HP Designjet 3D Colour to complement their existing products, covering a range from an easy to use desktop 3D printer up to a large additive manufacturing centre capable of building parts almost a metre square in a wide range of materials.

The HP Designjet 3D offers a totally automated solution for producing models in an office environment. Both building and support removal require no labour leaving the operator free to focus on creative activities. The consumables are all clean and easy to handle requiring only minutes a week to ensure the machine is always ready when needed. The system is environmentally friendly as Hewlett Packard provides a recycling scheme for empty material spools and unwanted models leaving no waste.

For further information come and visit the Laser Lines stand 4548 at MACH 2010.
